* **Alternate Route:**

Continue on Cornelius Pass Road to Hwy 30

Notes:

Safety is the number one priority to ensure everyone has a great time.

Parts of skyline Blvd. are extremely tight and twisty.
Rocky point road is a completely tight and twisty downhill road.
Sometimes Rocky Point Road has loose gravel in the corners.

If you are a new rider or
feel uncomfortable with extreme tight and twisty roads,
it is recommended that you take the alternate route of
Cornelius Pass Road to Hwy 30.

Even if you choose to take Skyline Blvd. and Rocky Point Road,
it is absolutely paramount that you ride within your comfort skill levels.

Ride your own ride.

If it takes you out of your comfort/skill level,
do not attempt to keep up with other riders .

Allow more skilled and faster riders to pass you.
